

Ashmithaa Sandiralingham

ashmithaa.sandiralingham@outlook.com | www.linkedin.com/in/ashmysan

Professional Summary

AI-focused Software Engineer with 3+ years of experience building scalable cloud-native applications using Python, FastAPI, React, Typescript, and Azure. Contributed to AI workflow platforms and enterprise systems, combining backend API design with modern frontend development. Interested in productising LLM-driven solutions and exploring agentic AI architectures in high-growth environments.

Creator of a personal cloud-hosted portfolio platform showcasing full-stack projects:

Education

BSc (Hons) Computer Science - Keele University (2:1)

Sep 2019 - Jul 2022

Final Year Project: Conducted performance benchmarking and scalability analysis of Django, Ruby on Rails, and React-based systems, evaluating backend efficiency, database interactions, and suitability for cloud deployment in modern web applications.

Skills

- **Programming Languages:** Python (Primary), TypeScript, JavaScript, SQL, Java
- **Backend & API Development:** FastAPI, REST API Design, Async Programming, Data Modelling, Logging & Monitoring, Performance Optimisation
- **Frontend Development:** React, HTML, CSS
- **Cloud & DevOps:** Microsoft Azure (App Services, Storage, Deployment), Docker, GitHub Actions
- **AI & Data:** LLM Integration Concepts, Prompt Engineering, AI Workflow Design, Data Engineering
- **Tools:** Git, GitHub, Postman, MongoDB, MySQL, VS Code, Cursor, Claude Code

Work Experience

Software Engineer – Publicis Sapient

Sep 2022 – Present

Worked across multiple enterprise engagements delivering cloud-based, AI-driven and data engineering solutions within agile teams.

CoreAI Internal Platform - AI Developer

- Developed React-based UI components enabling non-technical users to design and manage AI agent workflows.
- Contributed to AI workflow architecture discussions and backend integrations for scalable automation systems.

Lloyds Banking Group — Data Engineer

- Developed data processing pipelines analysing millions of banking records for regulatory and climate risk reporting.
- Optimised large-scale dataset transformations using SQL and SAS.

ASDA Release Programme — Scrum Master & Developer

- Coordinated large-scale backend platform migration from Walmart infrastructure, ensuring production stability and defect resolution.
- Collaborated with engineering and business stakeholders to deliver enterprise system transitions under tight timelines.

CodeAid Charity Project (Second Tree) — Tech Lead

- Led a development team to rebuild a humanitarian charity website, overseeing technical direction and stakeholder communication.
- Delivered an accessible, modern website and received positive client recognition.
- Received a [LinkedIn recommendation](#) from the client recognising professionalism and project delivery.

Digital Advisor – Keele University: Oliphant-Wood Consulting (Internship)

Aug 2022 – Sep 2022

- Worked with stakeholders to understand business processes and translate them into clear technical documentation.
- Received a [LinkedIn recommendation](#) from the client recognising professionalism and project delivery.

Certifications Achieved

- Certified Associate Python Programmer
- Microsoft Certified: Azure Fundamentals

Achievements

- [Publicis Sapient Accessibility Hackathon – 2nd Place](#) – Developed a Chrome extension prototype designed to improve web accessibility for neurodivergent users by enabling customizable reading and interaction features.
- [Bristol Reboot Hackathon – Lloyds Banking Group](#) – Participated in a fintech innovation hackathon, collaborating with cross-functional teams to prototype digital solutions addressing real banking challenges.
- [Publicis Sapient Internal Innovation Challenge Participant](#) – Contributed to internal technology innovation initiatives, collaborating with engineers to develop new product ideas and prototypes.

Immigration Status

- British Citizen & German Citizen
